

- Do you get tired of asking people to repeat themselves?
- Do you have to blare the tv?
- Would you like to know if your health insurance will cover the cost of hearing aids?

Did You Know:

- Those with untreated hearing loss have a significant **increase in dementia and Alzheimer's**, as well as **risk of falls** ~Johns Hopkins
- There's a link between hearing loss and heart disease ~ Howard University
- **Untreated hearing loss accelerates brain tissue loss** ~ Johns Hopkins, 2014

In the same way that you have regular physical exams, all adults need annual hearing exams as well. Early detection and treatment is key to preventing many of the factors mentioned above.

Join Nebraska Hearing for FREE hearing tests at Heart Ministry Center:

September 19, 9am-1pm

**402-933-1453**

You will **need to provide all insurance cards** so that we can check your coverage. Uninsureds can get tested as well.

Get a hearing test done and ***get a FREE goodie bag, too.***

We look forward to meeting you,

**Goot** and **Jennifer**
